Date: 20 July 2026

To: Quality Assurance Department, Aivora Pharmaceuticals Ltd.

Subject: Product Quality Complaint - Batch AB4521

Dear Quality Team,

I am writing on behalf of MedLife Distributors to formally report a quality complaint regarding a recent shipment of pharmaceutical product received from your facility.

Complainant / Customer Name: Rajesh Kumar, Procurement Manager, MedLife Distributors

Product Name: Amoxicillin Capsules

Strength/Grade: 500mg

Batch/Lot Number: AB4521

Manufacturing Date: 15 March 2025

Expiry Date: 15 March 2027

Quantity Affected: Approximately 200 capsules (out of a shipment of 5,000 units)

On 18 July 2026, our warehouse quality inspection team observed visible discoloration (yellowish-brown spotting) on a subset of capsules from the above batch during a routine incoming goods check. The affected capsules were isolated and photographed prior to this report. This is the second complaint we have raised concerning Batch AB4521 in the last 30 days; a similar but smaller-scale discoloration issue was reported informally by phone on 2 July 2026.

Given the recurrence, we request that your Quality Assurance team investigate the root cause of this discoloration, confirm whether the affected units pose any safety risk to patients, and advise whether the remaining stock from this batch should be quarantined pending your findings. We are placing the flagged units on hold and can ship samples to your facility for analysis upon request.

Please treat this as a priority given it is a repeat occurrence on the same batch.

Regards,

Rajesh Kumar

Procurement Manager, MedLife Distributors
